

Bachelor of Management (Oil and Gas Management)

KPT/JPS(PA4708)03/20

PROGRAMME DESCRIPTION

The energy sector at present is undergoing major development and is resulting in vital growth. This is coupled with rising international competition for resources. Thus all the organizations are forced to concentrate on developing strong management competencies. This course is designed for graduate level students with a wide range of backgrounds who aspire to develop careers in the Oil & Gas and related sectors. The curriculum for the Bachelor in Oil and Gas Management is structured such that it compliments other academic pursuits at the Lincoln University College. A greater portion of the curriculum is devoted to teaching the relationship between the human being and that of the environment in a manner that the students from the other management department can understand and devise solutions and programs for mitigation that would ultimately have these all these disciplines working side by side. The curriculum for the Bachelor in Oil and Gas Management is also structured in such a manner so that students from other Department of Business Administration from Lincoln University College and from environment, commerce and law students from outside of the Lincoln University College could enroll in the program to enrich their capacity in order to broaden their sphere of opportunities in the marketplace.

CAREER OPPORTUNITIES

There is currently a considerable shortage of professionals in the field of Administration of Oil and Gas industry within Malaysia and other gulf countries. The production and the demand of the oil and gas expert are increasing exponentially and currently to fill the positions as managerial, advisory and academic positions in the energy sector – private sector and government.
